

## LABORATORY WORK #1

### ON THE TOPIC

# "Deploying an ASP.NET Web Application to Azure App Service using Visual Studio 2022"

Goal: Create an App Service Web Application when you create a Web Project in Visual Studio; Deploy a web project to an MS Azure App Service Web Application.

Progress

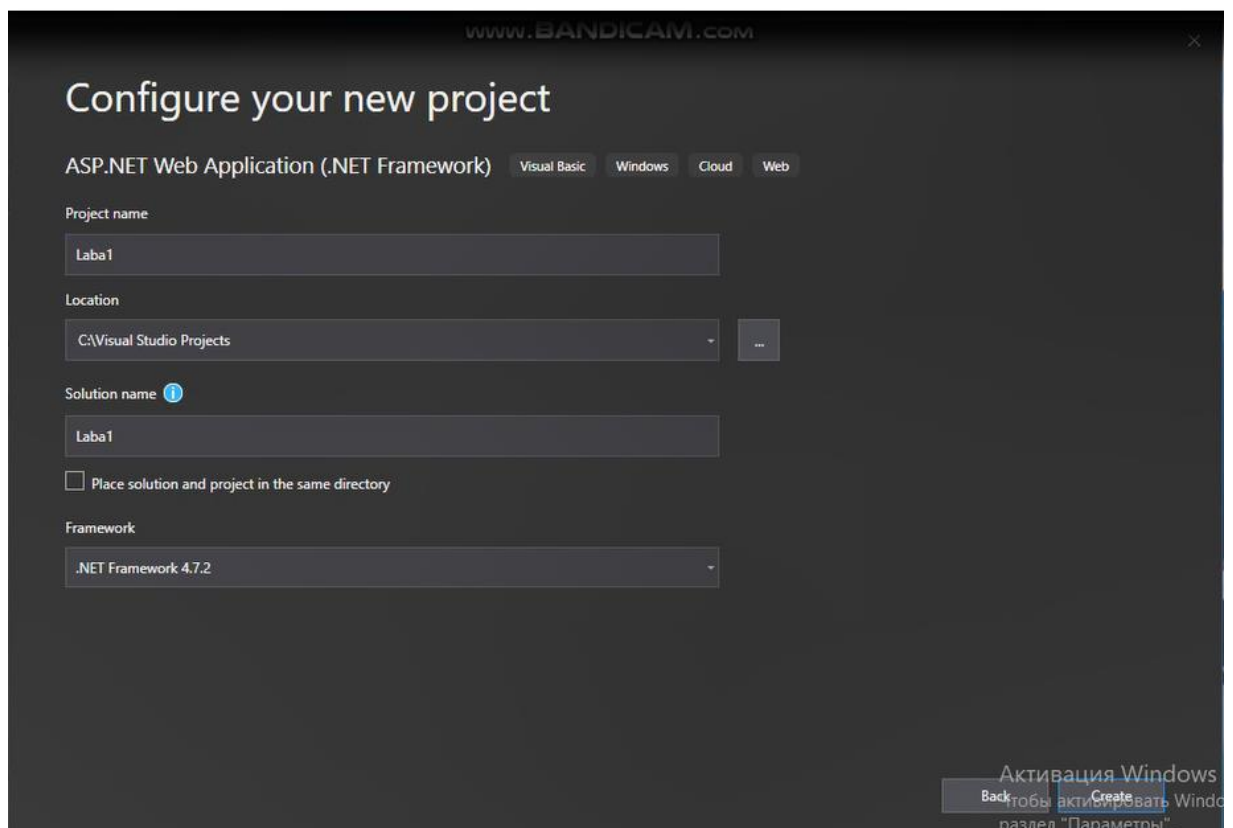

Fig. 1. Create an ASP .NET project in Visual Studio 2022

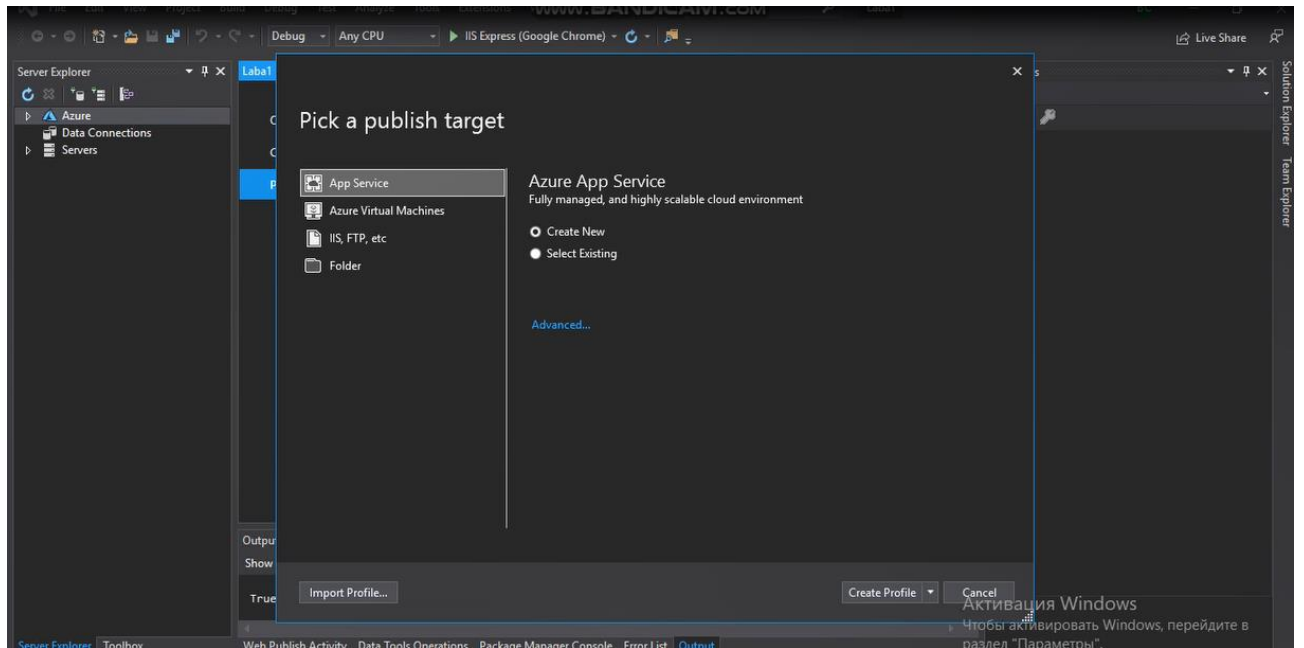

Fig. 2. Create a configuration file for deployment

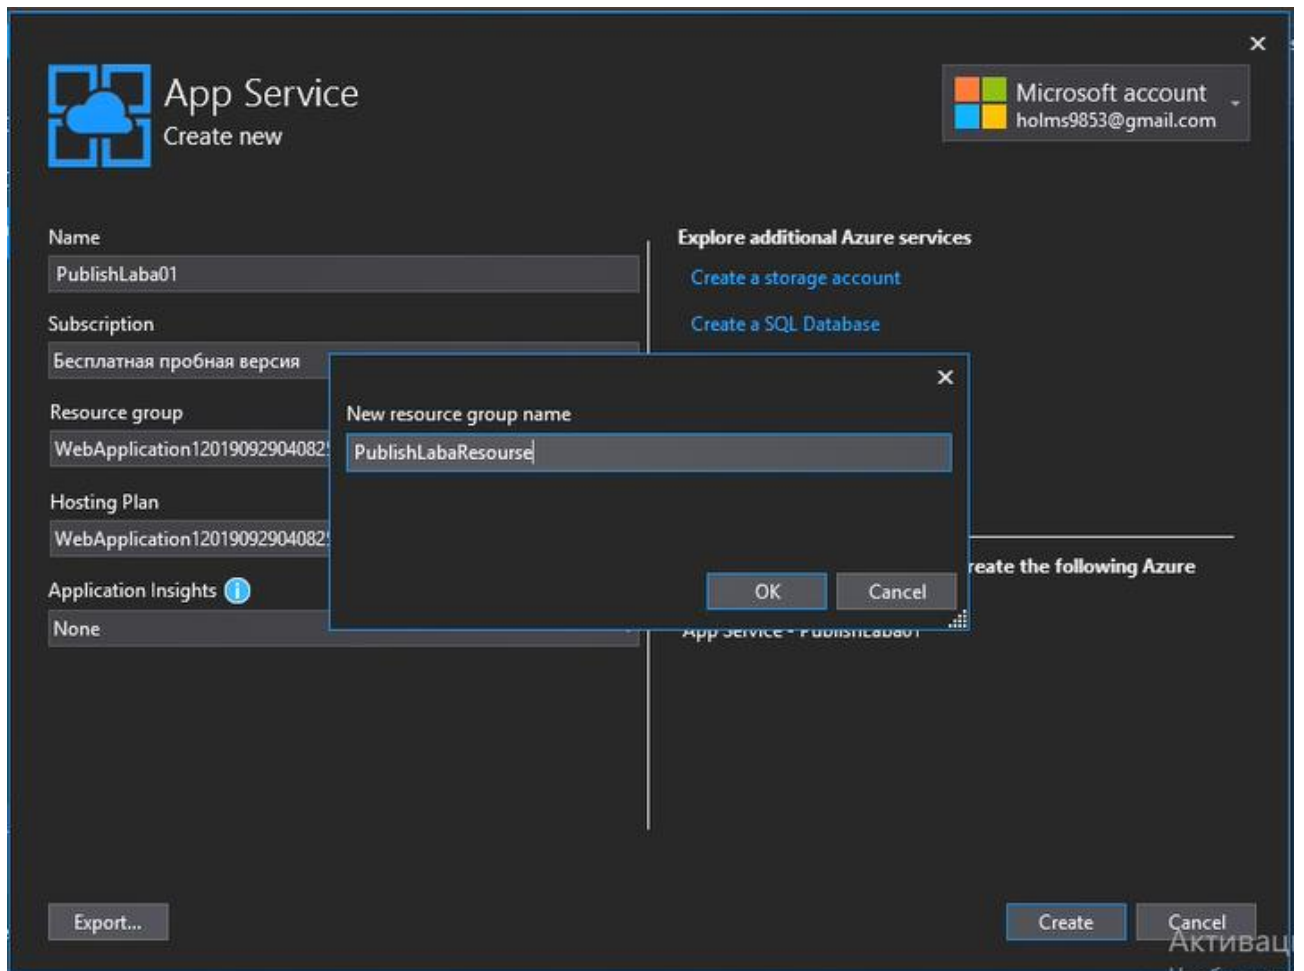

Fig. 2. Create a configuration file for deployment

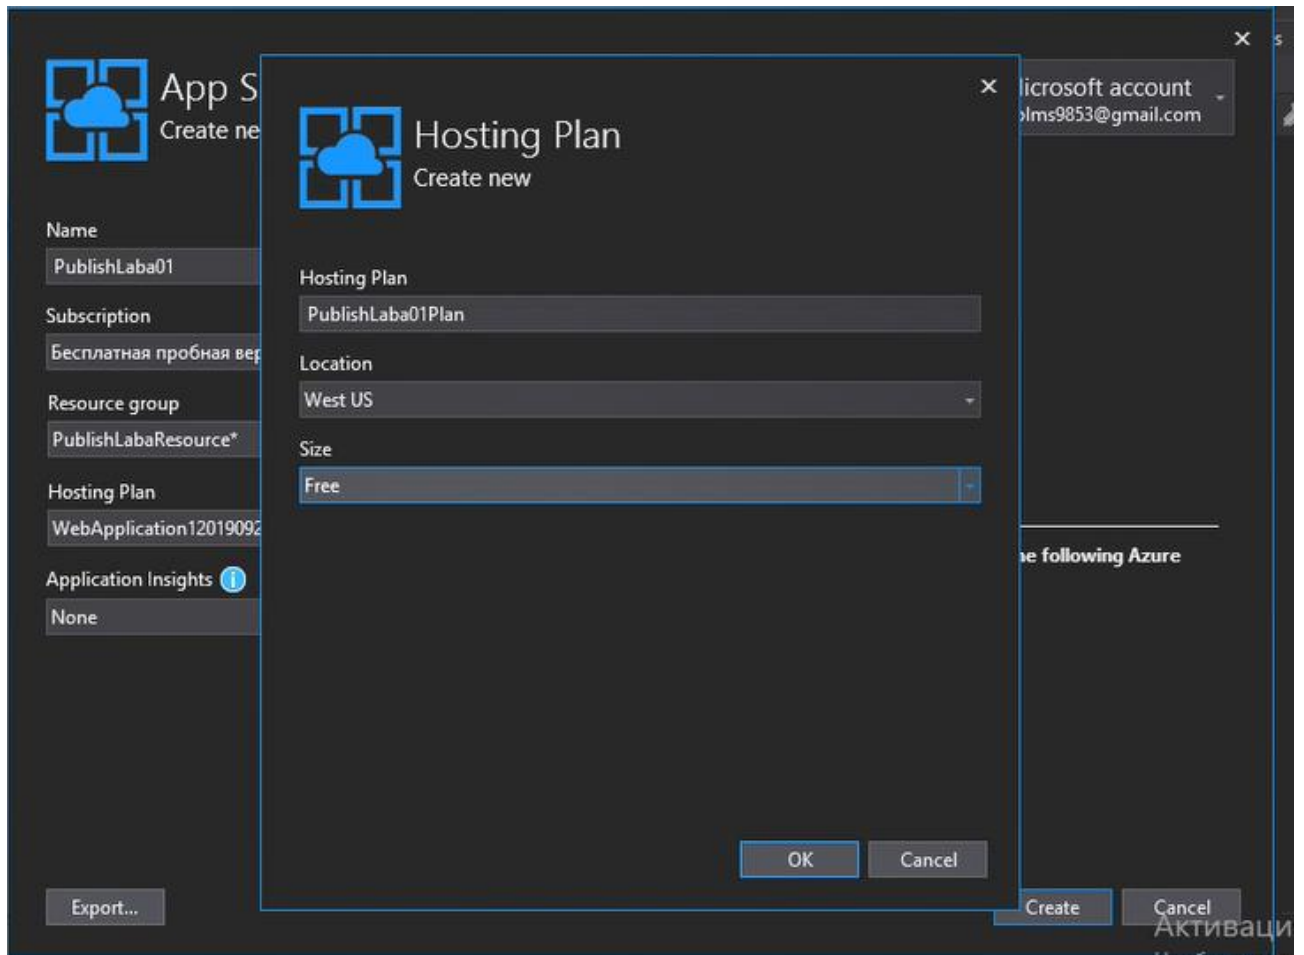

Fig. 4. Choosing a hosting plan

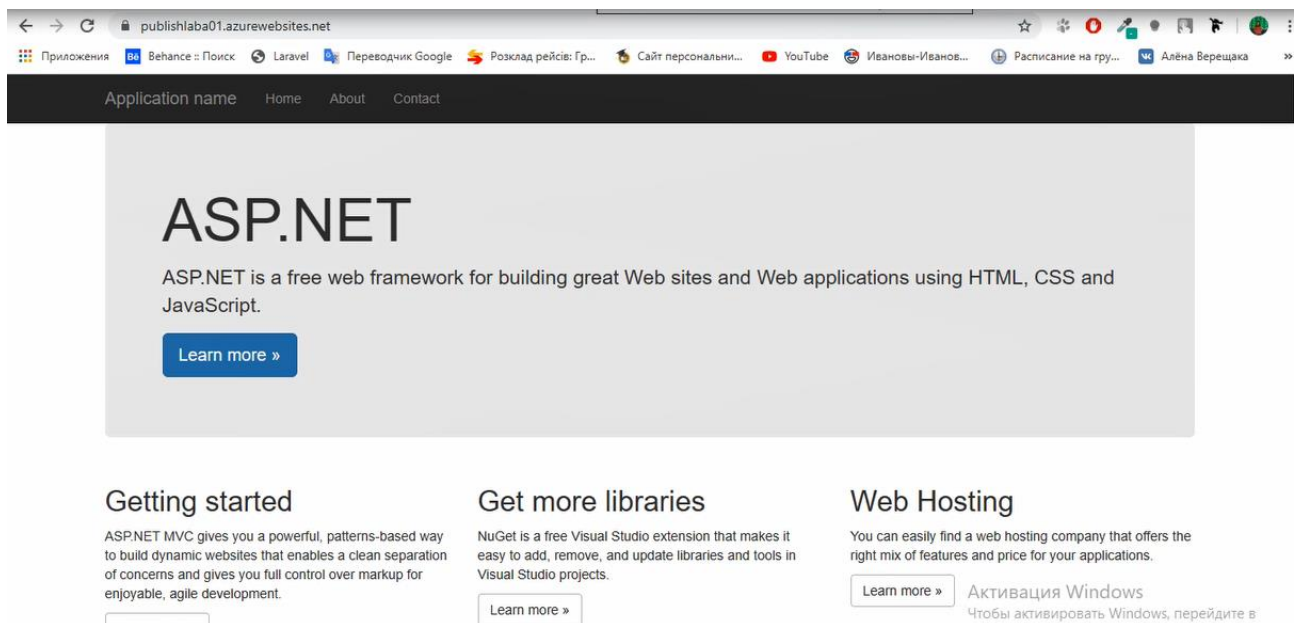

Fig. 5. Result of deployment on a portal MS Azure

Conclusion: An App Service web application was developed while creating a web project in Visual Studio. A web project for the MS Azure App Service Web Application was also deployed.
